

# INTERNATIONAL MARKETING & SUPPLY CHAIN MANAGEMENT

In the simplest sense, the supply chain is the process of creating products for customers. Supply chains span from raw materials, to manufacturing, distribution, transportation, warehousing and product sales. As you can imagine, when the number of resources, operations and functions increase, managing this supply chain can become very complex. As a result, managing a portfolio of assets and relationships to transform raw material into finished goods for consumers in the most efficient manner will provide a competitive edge for your organization.
